AquaWatch ML Deployment Report

Model Testing Results on Oversampled Dataset (SMOTE)

Model Name	Accuracy Score
ANN (Deep)	67.25%
KNN	65.88%
Random Forest	65.00%
Extra Trees	64.25%
AdaBoost	56.00%

Dashboard Export Choice (Backend-less Constraint): Random Forest

Note: SVM and KNN were evaluated but excluded from website export due to lazy-learning massive size limitations in JavaScript transpilation.
The best performing tree-based model was successfully compiled to TypeScript.
